Preface	xvii
<b>I Nonparametric Kernel Methods</b>	<b>1</b>
<b>1 Density Estimation</b>	<b>3</b>
1.1 Univariate Density Estimation	4
1.2 Univariate Bandwidth Selection: Rule-of-Thumb and Plug-In Methods	14
1.3 Univariate Bandwidth Selection: Cross-Validation Methods	15
1.3.1 Least Squares Cross-Validation	15
1.3.2 Likelihood Cross-Validation	18
1.3.3 An Illustration of Data-Driven Bandwidth Selection	19
1.4 Univariate CDF Estimation	19
1.5 Univariate CDF Bandwidth Selection: Cross-Validation Methods	23
1.6 Multivariate Density Estimation	24
1.7 Multivariate Bandwidth Selection: Rule-of-Thumb and Plug-In Methods	26
1.8 Multivariate Bandwidth Selection: Cross-Validation Methods	27
1.8.1 Least Squares Cross-Validation	27
1.8.2 Likelihood Cross-Validation	28
1.9 Asymptotic Normality of Density Estimators	28
1.10 Uniform Rates of Convergence	30
1.11 Higher Order Kernel Functions	33
1.12 Proof of Theorem 1.4 (Uniform Almost Sure Convergence)	36
1.13 Applications	41

1.13.1	Female Wage Inequality	42
1.13.2	Unemployment Rates and City Size	44
1.13.3	Adolescent Growth	45
1.13.4	Old Faithful Geyser Data	45
1.13.5	Evolution of Real Income Distribution in Italy, 1951–1998	46
1.14	Exercises	48
<b>2</b>	<b>Regression</b>	<b>59</b>
2.1	Local Constant Kernel Estimation	62
2.1.1	Intuition Underlying the Local Constant Kernel Estimator	66
2.2	Local Constant Bandwidth Selection	68
2.2.1	Rule-of-Thumb and Plug-In Methods	68
2.2.2	Least Squares Cross-Validation	71
2.2.3	$AIC_c$	74
2.2.4	The Presence of Irrelevant Regressors	75
2.2.5	Some Further Results on Cross-Validation	80
2.3	Uniform Rates of Convergence	80
2.4	Local Linear Kernel Estimation	81
2.4.1	Local Linear Bandwidth Selection: Least Squares Cross-Validation	85
2.5	Local Polynomial Regression (General $p$ th Order)	87
2.5.1	The Univariate Case	87
2.5.2	The Multivariate Case	90
2.5.3	Asymptotic Normality of Local Polynomial Estimators	91
2.6	Applications	94
2.6.1	Prestige Data	94
2.6.2	Adolescent Growth	94
2.6.3	Inflation Forecasting and Money Growth	95
2.7	Proofs	99
2.7.1	Derivation of (2.23)	100
2.7.2	Proof of Theorem 2.7	102
2.7.3	Definitions of $A_{l,p+1}$ and $V_l$ Used in Theorem 2.10	108
2.8	Exercises	110
<b>3</b>	<b>Frequency Estimation with Mixed Data</b>	<b>117</b>
3.1	Probability Function Estimation with Discrete Data	118

---

3.2	Regression with Discrete Regressors	120
3.3	Estimation with Mixed Data: The Frequency Approach	120
3.3.1	Density Estimation with Mixed Data	120
3.3.2	Regression with Mixed Data	121
3.4	Some Cautionary Remarks on Frequency Methods	122
3.5	Proofs	124
3.5.1	Proof of Theorem 3.1	124
3.6	Exercises	125
<b>4</b>	<b>Kernel Estimation with Mixed Data</b>	<b>127</b>
4.1	Smooth Estimation of Joint Distributions with Discrete Data	128
4.2	Smooth Regression with Discrete Data	133
4.3	Kernel Regression with Discrete Regressors: The Irrelevant Regressor Case	136
4.4	Regression with Mixed Data: Relevant Regressors	138
4.4.1	Smooth Estimation with Mixed Data	138
4.4.2	The Cross-Validation Method	140
4.5	Regression with Mixed Data: Irrelevant Regressors	142
4.5.1	Ordered Discrete Variables	146
4.6	Applications	147
4.6.1	Food-Away-from-Home Expenditure	147
4.6.2	Modeling Strike Volume	149
4.7	Exercises	152
<b>5</b>	<b>Conditional Density Estimation</b>	<b>157</b>
5.1	Conditional Density Estimation: Relevant Variables	157
5.2	Conditional Density Bandwidth Selection	159
5.2.1	Least Squares Cross-Validation: Relevant Variables	159
5.2.2	Maximum Likelihood Cross-Validation: Relevant Variables	162
5.3	Conditional Density Estimation: Irrelevant Variables	164
5.4	The Multivariate Dependent Variables Case	166
5.4.1	The General Categorical Data Case	169
5.4.2	Proof of Theorem 5.5	170
5.5	Applications	173
5.5.1	A Nonparametric Analysis of Corruption	173
5.5.2	Extramarital Affairs Data	173
5.5.3	Married Female Labor Force Participation	177

5.5.4	Labor Productivity	179
5.5.5	Multivariate $Y$ Conditional Density Example: GDP Growth and Population Growth Conditional on OECD Status	179
5.6	Exercises	181
<b>6</b>	<b>Conditional CDF and Quantile Estimation</b>	<b>183</b>
6.1	Estimating a Conditional CDF with Continuous Covariates without Smoothing the Dependent Variable	184
6.2	Estimating a Conditional CDF with Continuous Covariates Smoothing the Dependent Variable	186
6.3	Nonparametric Estimation of Conditional Quantile Functions	191
6.4	The Check Function Approach	193
6.5	Conditional CDF and Quantile Estimation with Mixed Discrete and Continuous Covariates	195
6.6	A Small Monte Carlo Simulation Study	198
6.7	Nonparametric Estimation of Hazard Functions	200
6.8	Applications	202
6.8.1	Boston Housing Data	202
6.8.2	Adolescent Growth Charts	204
6.8.3	Conditional Value at Risk	204
6.8.4	Real Income in Italy, 1951–1998	208
6.8.5	Multivariate $Y$ Conditional CDF Example: GDP Growth and Population Growth Conditional on OECD Status	208
6.9	Proofs	211
6.9.1	Proofs of Theorems 6.1, 6.2, and 6.4	211
6.9.2	Proofs of Theorems 6.5 and 6.6 (Mixed Covariates Case)	216
6.10	Exercises	217
<b>II</b>	<b>Semiparametric Methods</b>	<b>221</b>
<b>7</b>	<b>Semiparametric Partially Linear Models</b>	<b>223</b>
7.1	Partially Linear Models	224
7.1.1	Identification of $\beta$	224
7.2	Robinson's Estimator	224
7.2.1	Estimation of the Nonparametric Component	230

---

7.3	Andrews's MINPIN Method	232
7.4	Semiparametric Efficiency Bounds	235
7.4.1	The Conditionally Homoskedastic Error Case	235
7.4.2	The Conditionally Heteroskedastic Error Case	237
7.5	Proofs	240
7.5.1	Proof of Theorem 7.2	240
7.5.2	Verifying Theorem 7.3 for a Partially Linear Model	246
7.6	Exercises	248
<b>8</b>	<b>Semiparametric Single Index Models</b>	<b>251</b>
8.1	Identification Conditions	253
8.2	Estimation	255
8.2.1	Ichimura's Method	255
8.3	Direct Semiparametric Estimators for $\beta$	260
8.3.1	Average Derivative Estimators	260
8.3.2	Estimation of $g(\cdot)$	264
8.4	Bandwidth Selection	265
8.4.1	Bandwidth Selection for Ichimura's Method	265
8.4.2	Bandwidth Selection with Direct Estimation Methods	267
8.5	Klein and Spady's Estimator	268
8.6	Lewbel's Estimator	270
8.7	Manski's Maximum Score Estimator	271
8.8	Horowitz's Smoothed Maximum Score Estimator	272
8.9	Han's Maximum Rank Estimator	273
8.10	Multinomial Discrete Choice Models	274
8.11	Ai's Semiparametric Maximum Likelihood Approach	274
8.12	A Sketch of the Proof of Theorem 8.1	278
8.13	Applications	280
8.13.1	Modeling Response to Direct Marketing Catalog Mailings	280
8.14	Exercises	282
<b>9</b>	<b>Additive and Smooth (Varying) Coefficient Semiparametric Models</b>	<b>285</b>
9.1	An Additive Model	285
9.1.1	The Marginal Integration Method	286
9.1.2	A Computationally Efficient Oracle Estimator	288
9.1.3	The Ordinary Backfitting Method	291

9.1.4	The Smoothed Backfitting Method	292
9.1.5	Additive Models with Link Functions	297
9.2	An Additive Partially Linear Model	299
9.2.1	A Simple Two-Step Method	301
9.3	A Semiparametric Varying (Smooth) Coefficient Model	303
9.3.1	A Local Constant Estimator of the Smooth Coefficient Function	304
9.3.2	A Local Linear Estimator of the Smooth Coefficient Function	305
9.3.3	Testing for a Parametric Smooth Coefficient Model	308
9.3.4	Partially Linear Smooth Coefficient Models	310
9.3.5	Proof of Theorem 9.3	312
9.4	Exercises	314
<b>10</b>	<b>Selectivity Models</b>	<b>317</b>
10.1	Semiparametric Type-2 Tobit Models	318
10.2	Estimation of a Semiparametric Type-2 Tobit Model	319
10.2.1	Gallant and Nychka's Estimator	320
10.2.2	Estimation of the Intercept in Selection Models	321
10.3	Semiparametric Type-3 Tobit Models	322
10.3.1	Econometric Preliminaries	322
10.3.2	Alternative Estimation Methods	325
10.4	Das, Newey and Vella's Nonparametric Selection Model	330
10.5	Exercises	332
<b>11</b>	<b>Censored Models</b>	<b>333</b>
11.1	Parametric Censored Models	334
11.2	Semiparametric Censored Regression Models	336
11.3	Semiparametric Censored Regression Models with Nonparametric Heteroskedasticity	338
11.4	The Univariate Kaplan-Meier CDF Estimator	340
11.5	The Multivariate Kaplan-Meier CDF Estimator	343
11.5.1	Nonparametric Regression Models with Random Censoring	345
11.6	Nonparametric Censored Regression	347
11.6.1	Lewbel and Linton's Approach	347
11.6.2	Chen, Dahl and Khan's Approach	348

---

11.7 Exercises	351
<b>III Consistent Model Specification Tests</b>	<b>353</b>
<b>12 Model Specification Tests</b>	<b>355</b>
12.1 A Simple Consistent Test for Parametric Regression Functional Form	358
12.1.1 A Consistent Test for Correct Parametric Functional Form	359
12.1.2 Mixed Data	364
12.2 Testing for Equality of PDFs	366
12.3 More Tests Related to Regression Functions	369
12.3.1 Härdle and Mammen's Test for a Parametric Regression Model	369
12.3.2 An Adaptive and Rate Optimal Test	371
12.3.3 A Test for a Parametric Single Index Model	373
12.3.4 A Nonparametric Omitted Variables Test	374
12.3.5 Testing the Significance of Categorical Variables	379
12.4 Tests Related to PDFs	382
12.4.1 Testing Independence between Two Random Variables	382
12.4.2 A Test for a Parametric PDF	384
12.4.3 A Kernel Test for Conditional Parametric Distributions	386
12.5 Applications	389
12.5.1 Growth Convergence Clubs	389
12.6 Proofs	392
12.6.1 Proof of Theorem 12.1	392
12.6.2 Proof of Theorem 12.2	393
12.6.3 Proof of Theorem 12.5	393
12.6.4 Proof of Theorem 12.9	395
12.7 Exercises	398
<b>13 Nonsmoothing Tests</b>	<b>401</b>
13.1 Testing for Parametric Regression Functional Form	402
13.2 Testing for Equality of PDFs	405
13.3 A Nonparametric Significance Test	405
13.4 Andrews's Test for Conditional CDFs	406
13.5 Hong's Tests for Serial Dependence	408

13.6	More on Nonsmoothing Tests	413
13.7	Proofs	413
13.7.1	Proof of Theorem 13.1	413
13.8	Exercises	414
<b>IV Nonparametric Nearest Neighbor and Series Methods</b>		<b>417</b>
<b>14</b>	<b><i>K</i>-Nearest Neighbor Methods</b>	<b>419</b>
14.1	Density Estimation: The Univariate Case	419
14.2	Regression Function Estimation	423
14.3	A Local Linear $k$ -nn Estimator	425
14.4	Cross-Validation with Local Constant $k$ -nn Estimation	426
14.5	Cross-Validation with Local Linear $k$ -nn Estimation	429
14.6	Estimation of Semiparametric Models with $k$ -nn Methods	431
14.7	Model Specification Tests with $k$ -nn Methods	432
14.7.1	A Bootstrap Test	435
14.8	Using Different $k$ for Different Components of $x$	436
14.9	Proofs	436
14.9.1	Proof of Theorem 14.1	439
14.9.2	Proof of Theorem 14.5	439
14.9.3	Proof of Theorem 14.10	444
14.10	Exercises	448
<b>15</b>	<b>Nonparametric Series Methods</b>	<b>449</b>
15.1	Estimating Regression Functions	450
15.1.1	Convergence Rates	453
15.2	Selection of the Series Term $K$	455
15.2.1	Asymptotic Normality	457
15.3	A Partially Linear Model	458
15.3.1	An Additive Partially Linear Model	459
15.3.2	Selection of Nonlinear Additive Components	465
15.3.3	Estimating an Additive Model with a Known Link Function	467
15.4	Estimation of Partially Linear Varying Coefficient Models	470
15.4.1	Testing for Correct Parametric Regression Functional Form	475

---

15.4.2 A Consistent Test for an Additive Partially Linear Model	478
15.5 Other Series-Based Tests	483
15.6 Proofs	484
15.6.1 Proof of Theorem 15.1	484
15.6.2 Proof of Theorem 15.3	488
15.6.3 Proof of Theorem 15.6	492
15.6.4 Proof of Theorem 15.9	496
15.6.5 Proof of Theorem 15.10	501
15.7 Exercises	506
<b>V Time Series, Simultaneous Equation, and Panel Data Models</b>	<b>509</b>
<b>16 Instrumental Variables and Efficient Estimation of Semiparametric Models</b>	<b>511</b>
16.1 A Partially Linear Model with Endogenous Regressors in the Parametric Part	511
16.2 A Varying Coefficient Model with Endogenous Regressors in the Parametric Part	515
16.3 Ai and Chen's Efficient Estimator with Conditional Moment Restrictions	517
16.3.1 Estimation Procedures	517
16.3.2 Asymptotic Normality for $\hat{\theta}$	519
16.3.3 A Partially Linear Model with the Endogenous Regressors in the Nonparametric Part	521
16.4 Proof of Equation (16.16)	523
16.5 Exercises	526
<b>17 Endogeneity in Nonparametric Regression Models</b>	<b>527</b>
17.1 A Nonparametric Model	527
17.2 A Triangular Simultaneous Equation Model	528
17.3 Newey-Powell Series-Based Estimator	533
17.4 Hall and Horowitz's Kernel-Based Estimator	535
17.5 Darolles, Fan, Florens and Renault's Estimator	538
17.6 Exercises	539
<b>18 Weakly Dependent Data</b>	<b>541</b>
18.1 Density Estimation with Dependent Data	543

18.1.1	Uniform Almost Sure Rate of Convergence	546
18.2	Regression Models with Dependent Data	547
18.2.1	The Martingale Difference Error Case	547
18.2.2	The Autocorrelated Error Case	550
18.2.3	One-Step-Ahead Forecasting	552
18.2.4	$d$ -Step-Ahead Forecasting	553
18.2.5	Estimation of Nonparametric Impulse Response Functions	553
18.3	Semiparametric Models with Dependent Data	557
18.3.1	A Partially Linear Model with Dependent Data	557
18.3.2	Additive Regression Models	558
18.3.3	Varying Coefficient Models with Dependent Data	559
18.4	Testing for Serial Correlation in Semiparametric Models	560
18.4.1	The Test Statistic and Its Asymptotic Distribution	560
18.4.2	Testing Zero First Order Serial Correlation	561
18.5	Model Specification Tests with Dependent Data	562
18.5.1	A Kernel Test for Correct Parametric Regression Functional Form	562
18.5.2	Nonparametric Significance Tests	563
18.6	Nonsmoothing Tests for Regression Functional Form	564
18.7	Testing Parametric Predictive Models	565
18.7.1	In-Sample Testing of Conditional CDFs	565
18.7.2	Out-of-Sample Testing of Conditional CDFs	568
18.8	Applications	570
18.8.1	Forecasting Short-Term Interest Rates	570
18.9	Nonparametric Estimation with Nonstationary Data	572
18.10	Proofs	573
18.10.1	Proof of Equation (18.9)	573
18.10.2	Proof of Theorem 18.2	575
18.11	Exercises	578
<b>19</b>	<b>Panel Data Models</b>	<b>581</b>
19.1	Nonparametric Estimation of Panel Data Models: Ignoring the Variance Structure	582
19.2	Wang's Efficient Nonparametric Panel Data Estimator	584
19.3	A Partially Linear Model with Random Effects	590
19.4	Nonparametric Panel Data Models with Fixed Effects	592

---

19.4.1	Error Variance Structure Is Known	593
19.4.2	The Error Variance Structure Is Unknown	596
19.5	A Partially Linear Model with Fixed Effects	598
19.6	Semiparametric Instrumental Variable Estimators	600
19.6.1	An Infeasible Estimator	600
19.6.2	The Choice of Instruments	602
19.6.3	A Feasible Estimator	604
19.7	Testing for Serial Correlation and for Individual Effects in Semiparametric Models	605
19.8	Series Estimation of Panel Data Models	608
19.8.1	Additive Effects	608
19.8.2	Alternative Formulation of Fixed Effects	610
19.9	Nonlinear Panel Data Models	612
19.9.1	Censored Panel Data Models	613
19.9.2	Discrete Choice Panel Data Models	620
19.10	Proofs	624
19.10.1	Proof of Theorem 19.1	624
19.10.2	Leading MSE Calculation of Wang's Estimator	627
19.11	Exercises	630
<b>20</b>	<b>Topics in Applied Nonparametric Estimation</b>	<b>633</b>
20.1	Nonparametric Methods in Continuous-Time Models	633
20.1.1	Nonparametric Estimation of Continuous-Time Models	633
20.1.2	Nonparametric Tests for Continuous-Time Models	638
20.1.3	Ait-Sahalia's Test	638
20.1.4	Hong and Li's Test	639
20.1.5	Proofs	642
20.2	Nonparametric Estimation of Average Treatment Effects	645
20.2.1	The Model	646
20.2.2	An Application: Assessing the Efficacy of Right Heart Catheterization	648
20.3	Nonparametric Estimation of Auction Models	651
20.3.1	Estimation of First Price Auction Models	651
20.3.2	Conditionally Independent Private Information Auctions	654
20.4	Copula-Based Semiparametric Estimation of Multivariate Distributions	657

20.4.1	Some Background on Copula Functions	657
20.4.2	Semiparametric Copula-Based Multivariate Distributions	658
20.4.3	A Two-Step Estimation Procedure	659
20.4.4	A One-Step Efficient Estimation Procedure	661
20.4.5	Testing Parametric Functional Forms of a Copula	663
20.5	A Semiparametric Transformation Model	665
20.6	Exercises	668
<b>A</b>	<b>Background Statistical Concepts</b>	<b>669</b>
1.1	Probability, Measure, and Measurable Space	669
1.2	Metric, Norm, and Functional Spaces	678
1.3	Limits and Modes of Convergence	686
1.3.1	Limit Supremum and Limit Infimum	686
1.3.2	Modes of Convergence	687
1.4	Inequalities, Laws of Large Numbers, and Central Limit Theorems	694
1.5	Exercises	700
